### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Claim 1 recites the limitation "the end" in line 11. There is insufficient antecedent basis for this limitation in the claim.
- Claim 1 recites "inside surface" in line 12, but does not provide any specifics as to inside surface of what.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Regnier (6273762).

Art Unit: 2839

Regnier (Figures 7-8) shows an electrical connector with a plurality of latching apparatus, each having a supporting arm 105 with a latching pivot at a top portion with a curved surface formed of two surfaces 108, 109 and a fixed support portion having an indentation-curved surface, an elastic arm 120 extending from a lower portion of the supporting arm, a base arm extending from a lower portion of the elastic arm and a free contact 121 extending from an end of the base arm wherein the free end has a saw-toothed portion on an outside surface. The angle between the fixed support portion and the supporting arm is between 93 to 100 degrees. But Regnier does not a plurality of saw-toothed portion and the saw-toothed portions being on an inside surface of the free contact. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to provide a plurality of plurality of saw-toothed portions and the saw-toothed portions being on an inside surface of the free contact because this would require a mere duplication and rearrangement of essential parts, which involve only routine skill in the art.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jaag (6341989), Bowling et al. (6371788) and Burkart (6439903).
